ABOUT ME

Dual-degree student at IIT Madras and DAVV, specializing in AI and Data Science. Builds end-to-end AI systems, from reinforcement learning agents and RAG pipelines to multi-agent security platforms and full-stack web applications. Serving as AI/ML Lead at Google Developer Club, with a track record of winning hackathons and delivering production-ready projects.

EDUCATION

B.Sc. in Data Science & Applications (Pursuing)
Indian Institute of Technology Madras : CGPA: 8.23

Integrated Masters of Computer Applications (Pursuing)
Devi Ahilya Vishwavidyalaya, Indore : CGPA: 8.5

Class XII / Higher Secondary (2022–23)
Advanced Academy, Indore, MP : 91%

Class X / Secondary Education (2020–21)
Advanced Academy, Indore, MP : 93%

ACADEMIC PROJECTS

- **Prosperity analyzer web app** : Built a web application for analyzing and visualizing prosperity metrics, deployed live. [GitHub] [Live]
- **AI agent for container security and threat detection** : Simulates real-world container attack scenarios and detects threats using a multi-agent system with real-time reporting. [GitHub]
- **Tech news aggregator & Telegram notifier (n8n)** : Automated n8n workflow that scrapes the latest tech news from multiple sources and delivers curated updates directly to a Telegram channel. [GitHub]
- **GitHub project maintenance agent (n8n)** : n8n automation that monitors a GitHub repository, analyzes commit history, and generates actionable insights to assist in ongoing project maintenance. [GitHub]
- **CNN model for brain tumor detection** : Developed a CNN model that highlights tumor regions in brain MRI scans.
- **Moon rover automation via reinforcement learning** : Implemented RL to autonomously land a rover in a simulated environment.
- **Agentic AI for cross-platform sales automation** : Built an AI agent that manages customer interactions and end-to-end processing across multiple platforms.
- **Scraper for mapping traditional medicine codes** : Automated extraction and alignment of code data from WHO ICD-11 and Ministry of AYUSH sources.

ACHIEVEMENTS

- Selected in **Top 500** out of 20,000 participants at HackIndore.
- **AI/ML Lead** at Google Developer Club for Students.
- **Winner** of internal Smart India Hackathon.

SKILLS

Programming & Frameworks: Python, TypeScript, Java, Flask, FastAPI, Next.js, scikit-learn, NumPy, Pandas, LangChain

AI/ML: Reinforcement Learning, RAG Applications, Vector Databases, AI Agents, LLM Fundamentals, Small Language Models, NLP, Machine Learning Pipelines

Tools & Cloud: Docker, Vercel, n8n, Linux, Git, Shell Scripting
