SHREYAS NAMDEO

namdeoshreyaslink@gmail.com | +91-9826411080 | Indore, MP | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Dual-degree student at IIT Madras and DAVV specializing in AI and Data Science, with hands-on experience building end-to-end systems , reinforcement learning agents, RAG pipelines, multi-agent security platforms, and full-stack web applications. Currently AI/ML Lead at Google Developer Club, focused on shipping production-ready AI projects and applied agentic-AI tooling.

TECHNICAL SKILLS

- **Programming & Frameworks:** Python, HuggingFace, PyTorch, Flask, FastAPI, Rust, scikit-learn, NumPy, Pandas, LangChain, LangGraph
- **AI/ML:** Reinforcement Learning, RAG Applications, Vector Databases, AI Agents, LLM Fundamentals, Small Language Models, NLP, ML Pipelines
- **Tools & Cloud:** Docker, Vercel, n8n, Linux, Git, Shell Scripting

PROFESSIONAL EXPERIENCE

AI/ML Lead 2025 - Present
Google Developer Club

- Lead AI/ML workshops and project tracks for club members, guiding applied machine learning and agentic-AI builds from concept to demo.
- Mentor student teams on hackathon submissions and technical project scoping across the club's AI/ML initiatives.

KEY PROJECTS

BPIP: Bengaluru Parking Intelligence Platform *(Python, PyTorch, FastAPI, React, Leaflet)* | GitHub

- Built a full-stack spatio-temporal forecasting platform predicting illegal-parking hotspots across ~7,800 Bengaluru grid zones for traffic-enforcement planning, achieving a validation RMSE of 2.83 with a custom PyTorch model.

CLI Portfolio Server *(Go, Bubble Tea, SSH, SQLite, Docker)* | GitHub

- Built an SSH-accessible terminal portfolio using the Charm stack (Wish, Bubble Tea, Lip Gloss), featuring live GitHub API integration and an animated ASCII intro screen.

Sentinel: AI Code Reviewer with Harness Engineering *(Python, LangGraph, LLMs)* | GitHub

- Built a multi-agent AI system that audits GitHub repositories using specialized LLM agents with a production-grade harness, reducing hallucinations while keeping audit costs under $0.02 per repository.

Mcpgen: Automated MCP Server Generator *(Python, LLMs, Firecrawl, Playwright)* | GitHub

- Built an AI-powered CLI tool that generates MCP servers from API docs or websites using LLM analysis and code generation, supporting both REST APIs and browser automation for Claude integration.

AI Agent for Container Security and Threat Detection *(Python, Multi-Agent Systems)* | GitHub

- Simulated real-world container attack scenarios and detected threats using a multi-agent system with real-time reporting.

EDUCATION

B.Sc. in Data Science & Applications 2023 - Present
Indian Institute of Technology Madras • GPA: 8.23

Bachelor of Computer Applications (BCA) 2023 - 2026
Devi Ahilya Vishwavidyalaya, Indore • *Completed* • GPA: 8.5

Master of Computer Applications (MCA) 2026 - 2028
Devi Ahilya Vishwavidyalaya, Indore • *In Progress*

Class XII / Higher Secondary 2022 - 2023
Advanced Academy, Indore, MP • 91%

Class X / Secondary Education 2020 - 2021
Advanced Academy, Indore, MP • 93%

CERTIFICATIONS & AWARDS

- Applications of AI for Anomaly Detection - NVIDIA, Jan 2026
- Perform Foundational Data, ML, and AI Tasks in Google Cloud - Google, Oct 2023
- Analyze Sentiment with Natural Language API - Google Cloud, Apr 2024
- Create ML Models with BigQuery ML - Google Cloud, Jan 2024
